EXPERIENCE

TLF Apparel, Ft Lauderdale, FI

Feb 2023 – Present

Junior Web Developer

- Lead migration efforts from liquid codebase to react components for the company's merchant shop which resulted in 20% quicker load times for end users, enhanced scalability, and eased maintainability.
- Integrated data critical components for merchant shop leveraging queries to production MongoDB instance.
- Demonstrated strong problem-solving abilities by effectively troubleshooting and resolving issues encountered during development and deployment phases.
- Improve product aesthetic and UX of the company's customer facing merchant shop.
- Document and commit all new code by way of source control via GitHub.
- Actively contribute innovative solutions and foster a supportive work environment on a team of 3 developers.

4 Geeks Academy, Miami, FI

Feb 2023 – March 2023

Teaching Assistant

- Collaborated with instructor to teach web development concepts and techniques, focusing on HTML, CSS, JavaScript, React, and GitHub version control.
- Conducted code reviews, offering constructive feedback to enhance students' coding practices and quality of output.
- Guiding students in understanding coding principles by offering clear explanations, practical examples, and dedicated support throughout their learning journey

SKILLS

- Languages: Javascript, Liquid, HTML, and CSS
- Frontend Frameworks: React and Bootstrap
- Backend Frameworks: Node.js
- VSCode
- Shopify
- Fluently bilingual in Spanish and English
- Source Control (Git)

EDUCATION

Miami Dade College, Miami, FL

Fall 2024

A.A. in Computer Science

Law Enforcement Officers Memorial High School

Spring 2022

4Geeks Academy, Miami, FL

Winter 2022

- Lead team final project which consisted of a fully functional proxy website that utilized API calls from third party AI engine to generate dynamic images.
- Worked with version control via GitHub and concepts such as pulling, pushing, committing, branching, etc.
- Worked with languages such as JavaScript, HTML, and CSS
- Worked with frontend and backend frameworks such as React, Node.js, and Bootstrap
- Worked with API and learned about concepts such as authentication types (oauth 2.0 and basic auth), CRUD, etc.
